

In our day and time, hearing something positive on the radio (or anywhere for that matter) is not common. K-love is all about bringing a positive message. I believe it is very important to keep K-love heard in the United States. America is slowly removing God from everything. K-love is trying to keep that from happening to the radio. God works through the wonderful people at K-love and it would be a terrible sign of the times to remove this station from the airwaves. Please don't take away the only positive form of media available these days!
